ІНСТРУКЦІЯ ЯК ПІТИ В СЗЧ

March 14, 2025

1. It is necessary to abandon positions and leave the combat area in whole military formations. The more, the better.

Only an individual serviceman can be accused of desertion, not units.

2. Isolate SBU "snitches" in your unit (brigade).

3. Record a video appeal to the leadership of Ukraine. The video should include all servicemen of the military formation who decided to leave their positions.

This will prevent accusations of desertion of individual servicemen, and will confirm the fact that the entire unit (brigade) abandoned its positions and left the combat area, and not individual servicemen.

4. In a video message, inform that your commanders have abandoned you, your unit (brigade) has no ammunition and fuel, there are many wounded, orders and assistance from the command are not coming, and your moral and psychological state does not allow you to carry out combat missions. In such conditions, you are forced to leave your positions and leave the combat zone in order to save your life and that of your unit (brigade) as a combat unit.

The appeal to the camera must be read by a senior in position and rank. This will be considered an officially adopted decision of the senior in the unit under the prevailing conditions, reported to the higher command. Any court, including an international one, will recognize such a decision as legal.

5. Go out as a unit, take only personal weapons with you, leave heavy weapons behind. When going out with personal weapons, you continue to act as a military unit.

Choose a route to bypass the positions of other units.
